| SCOOTER WEIGHT 35kg / 77lbs | SPEEDOMETER Smart LCD display | RIDER MINIMUM AGE / SIZE RANGE 16 years old (between 150-215 cm) |

BATTERY

The battery is the main energy source of your SYNERGY CYCLONE, so be sure to treat it with care at all times. We recommend that you recharge it only with the charger provided with your SYNERGY CYCLONE.

BATTERY FUNCTIONS

1. There are three key positions — **on**, **locked** and **unlocked**.
2. When the key is turned to the **unlocked** position, the battery ready to be removed.
3. In the **locked** position (which can be found by turning the key one click from the unlocked position), the battery cannot be removed, and motor cannot be switched on.
4. In the **on** position (which can be found by turning the key two clicks from the unlocked position), you have full use of your bike's electronic components. When the key is in the **on** position, turn the motor and LCD screen on and off by pushing the power button on the display.
